Tamarind

Tamarind powder is made from dehydrated and ground tamarind. The flavour is highly concentrated as opposed to fresh tamarind and is intensely more sweet-and-sour.

The flavour is often used to add to sauces, chutneys, lentil and legume dishes, and pickles. In Western kitchens, chefs often use tamarind powder to craft BBQ sauces, ketchup, pizza sauces, and as a seasoning for wild game.

Seedless Tamarind Specification (%/wt max)

Grades	Special Grade	Agrade
Moisture	15	17
Seed Content	5	10
Foreign Matter (Organic)	4	6
